Overview

Diapo is a designer and manufacturer of bespoke and branded architectural structures.

Our company strives to design and produce high quality interior features and design led products.

Diapo has built a reputation within the industry for producing and delivering products of the highest standard with a vigorous attention to detail.

Evolving around a team with many years of experience and a rooted passion for design, we have over the past years specialised in the design and manufacturing of bespoke and branded staircases.

Our unique service offers a wide arrange of different types of staircases including Spiral, Helical, Winders and Straight flights.

Stair System

We have recently developed our own range of system based components for stairs and balustrades to make our market leading quality available to a wider market.

We also offer concepts of our own design to create a unique and truly individual feature.

If you would like to find out more about our range of stair systems and balustrades, please contact Diapo for more information.

Whatever shape, design or requirements you may have in mind for your staircase, we can realise your vision and create a unique stunning feature for your interior.

Services

Our operation enables us to undertake projects ranging from large scale production to one off architectural pieces, executed in a wide variety of materials and finishes. We have solid experience in designing with structural glass, metal and timber.

The key to our success lies in our industrial approach to design. This comprises the ability to offer technical and creative direction to generate bespoke designs and offer cost effective solutions.

What Diapo can successfully offer is a holistic solution to your design, from the initial to the final stage of a project. Over the years we have built up a good and sustainable relationship with all our core-contractors and they are all part of the success of Diapo as a brand.

Initial Design

Diapo will help you to turn your idea into a working concept, and help you communicate your design intent.

Based upon our experience we will also advise on the manufacturing process, material surface treatments and textures that are appropriate for your application. Importantly, Diapo will also consult on all necessary information in terms of compliance with building regulation.

Construction & Engineering Drawings

By using advanced software we are fully capable of translating complex 3D shapes into manufacturable components.

Structural design is carried out in association with an industry leading structural engineering practice.

Manufacturing

Our production facilities and network of subcontractors enable us to undertake projects, executed in a wide variety of materials and finishes.

Our manufacturing expertise is supported by a computer based modelling system, used to apply mechanical engineering processes and tolerance to the design.

All these skills are brought together to execute complex and challenging projects with professionalism and commitment to quality. Finally, as a quality assurance, all components are assembled 'in house' prior to installation on site.

Site Installation

Partly assembled or fully assembled staircases will be delivered on site; with our experienced personnel enabling a successful installation.
