Overview

Diapo offers a comprehensive service in providing our clients with ideas and subsequently turning those ideas into realities. Our company strives to design and produce products of the absolute highest quality where our experience meets the clients needs. Over the years, we have built a reputation for producing and delivering products of the highest standard with a vigorous attention to detail.

Evolving around a team of great experience and a rooted passion for design, we are mainly specialised in the design and manufacturing of customized staircases.

Our experience covers all types of staircase configurations; helical-, spiral-, elliptic- and straight-, just to name a few.

Staircases

Diapo has built a highly respectable portfolio of work covering a wide array of different designs. Whatever shape, design or requirements you may have in mind, we can realise your vision and create an absolute stunning feature suitable for your unique needs.

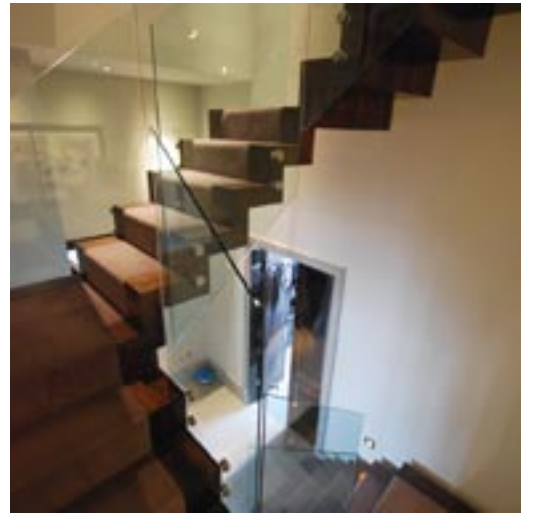

If you have got questions or are requesting any information then please do not hesitate to contact us. A few of the projects that we have done over the recent years can be seen on, www.diapo.co.uk.

Services

Our operation enables us to undertake projects ranging from large scale productions to one off flights. We work with a broad range of materials and finishes. We have extensive experience in working work with metal, structural glass, timber, stone, composites and acrylics. Diapo is constantly seaching for new materials and new methods of manufacturing to incorporate into our manufacturing process.

The key to our success lies in our industrial approach to design. This comprises the ability to offer technical and creative direction to generate bespoke designs and offer cost effective solutions.

What Diapo can successfully offer is a holistic solution, from the initial phase to the final stage of the project.

Initial Design

Diapo will help you to turn your idea into a working concept, and furthermore to establish and visualise your design intent. Based upon our experience we will also advise on what manufacturing process, material surface treatments and finishes that are appropriate for your idea. Importantly, Diapo will also consult on all necessary information in terms of compliance with regulations and building control.

Manufacturing

Our in-house production facilities together with our extensive network of subcontractors enable us to undertake projects, executed in a wide variety of styles, materials and finishes. The skills are brought together to execute complex and challenging projects with professionalism and commitment to quality. As a quality assurance, all components are assembled 'in house' prior to installation on site.

Construction & Engineering

By using digital tools, we are fully capable of translating complex 3D shapes into manufacturing components. Structural calculations are carried out in association with an industry leading structural design and engineering practice.

Site Installation

All parts and components are delivered to site where our experienced "installation team" makes sure that the staircase is finally installed and finished to the absolute highest standard.

The Diapo logo consists of the word "diapo" in a lowercase, sans-serif font. The letters are white with a dark outline, and the 'i' and 'o' have a dot and a tail respectively. The logo is positioned in the bottom right corner of the page, above the contact information.
